

# BUSHI DAIRY FARM INDIVIDUAL HEALTH RECORDS

## ANIMAL IDENTIFICATION AND HISTORY

|                                   |  |
|-----------------------------------|--|
| ID/Tag no.                        |  |
| Age                               |  |
| Breed                             |  |
| sex                               |  |
| Body weight                       |  |
| Status(pregnant/cycling/serviced) |  |
| Parity                            |  |
| Daily milk yield                  |  |
| Days in milk                      |  |

## CLINICAL EXAMINATION

1. Major complaint \_\_\_\_\_
2. Past history (Medical, surgical, Trauma, Vaccination, Deworming) \_\_\_\_\_
3. Environment \_\_\_\_\_
4. System review \_\_\_\_\_

|                  |                        |                             |                |                         |  |
|------------------|------------------------|-----------------------------|----------------|-------------------------|--|
| Body temperature | Pulse rate(beats/mins) | Respiratory rate(beats/min) | CRT (2seconds) | Rumino-motility (2 min) |  |
|------------------|------------------------|-----------------------------|----------------|-------------------------|--|

## CLINICAL EXAMINATION FINDINGS

| SYSTEM                   | STATUS(Normal/Abnormal) | SPECIFIC OBSERVATIONS |
|--------------------------|-------------------------|-----------------------|
| General appearance (BCS) |                         |                       |
| Integumentary            |                         |                       |
| Musculoskeletal          |                         |                       |
| Circulatory              |                         |                       |
| Respiratory              |                         |                       |
| Digestive                |                         |                       |
| Genitourinary            |                         |                       |
| Ears/Eyes                |                         |                       |
| Mammary system/Udder     |                         |                       |
| Neural system            |                         |                       |
| Lymph nodes              |                         |                       |
| Circulatory (MM/CRT)     |                         |                       |

Significant findings \_\_\_\_\_

Tentative diagnosis \_\_\_\_\_

### LABORATORY FINDING AND FINAL DIAGNOSIS

|             |  |             |  |
|-------------|--|-------------|--|
| Blood smear |  |             |  |
| PCV         |  | Eosinophils |  |
| Basophils   |  | Neutrophils |  |

Bacteriology culture & sensitivity results \_\_\_\_\_

Skin scrapings \_\_\_\_\_

Feecal sample \_\_\_\_\_

Other laboratory \_\_\_\_\_

Findings \_\_\_\_\_

### DIAGNOSIS, TREATMENT AND WITHDRAW COMPLIANCE

Tentative/Final diagnosis

| Drug/vaccine | Prescription (dose, dosage and route) |
|--------------|---------------------------------------|
|              |                                       |
|              |                                       |
|              |                                       |
|              |                                       |
